**Initialization of SafeNet**

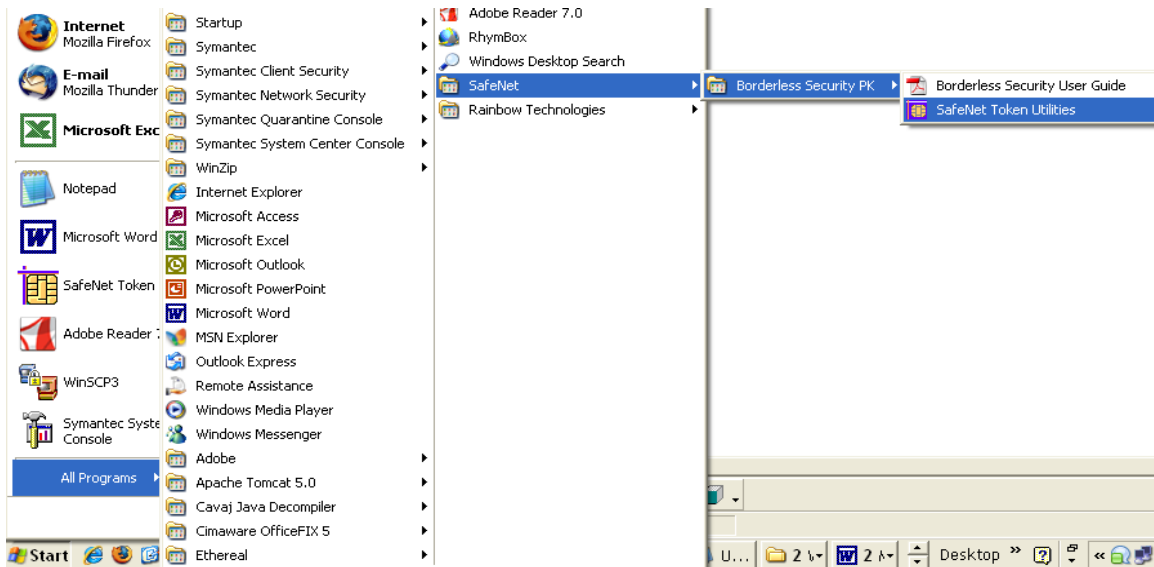

**iKey 2032**

**ABOUT THE DOCUMENT**

This document describes the procedure to initialize SafeNet iKey 2032 USB Token. Initialization is required when the PIN to access the token is forgotten or incase when the token has to be formatted or cleaned up. This will erase all the data i.e, certificate and keys from the token and set the Password to a default one, which is **"Password#1"**

**GETTING STARTED**

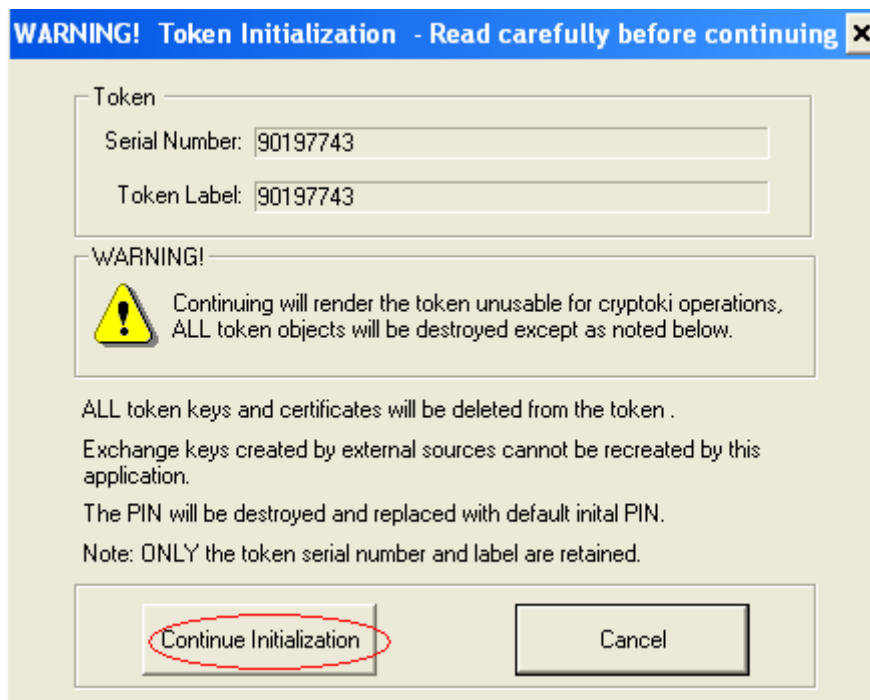

1. From the Start menu, select **All Programs>SafeNet>Borderless Security PK>SafeNet Token Utilities.**
- 2.

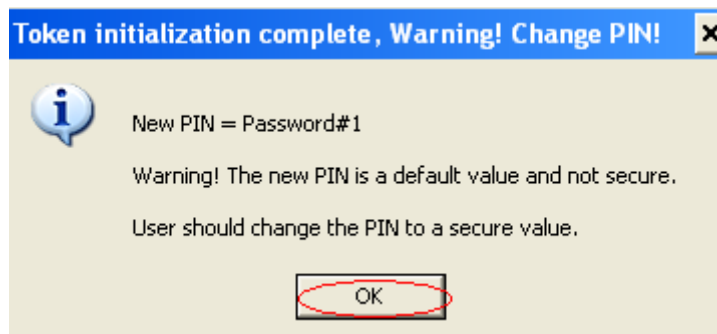

2. Click **Token > Initialize Token.**

3. A **WARNING!** Message is displayed. Read it carefully before proceeding with initialization. On confirmation click **Continue Initialization**

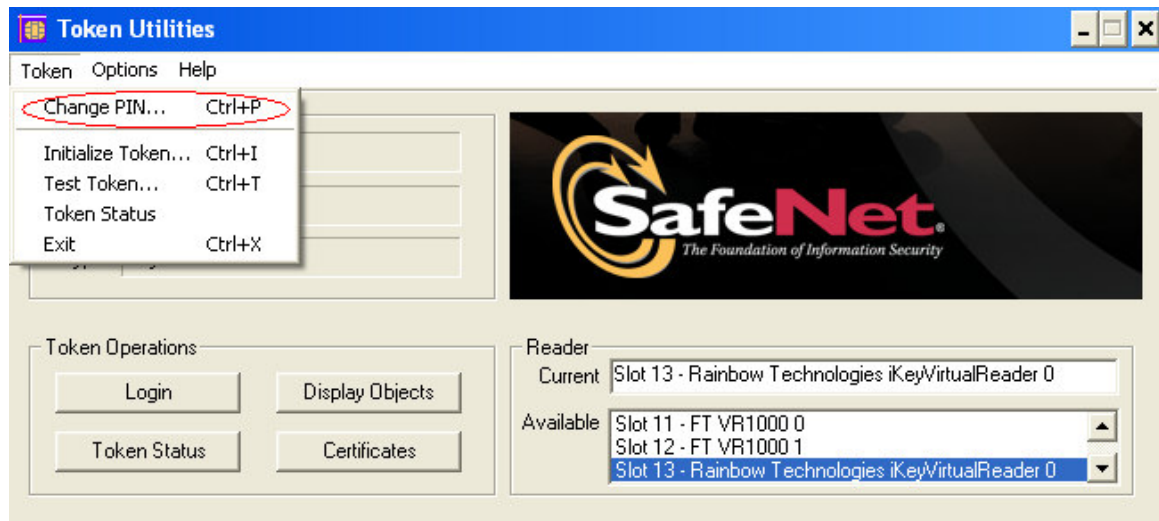

4. Once initialization is complete, the below message box appears. Note the default PIN and click **OK**.

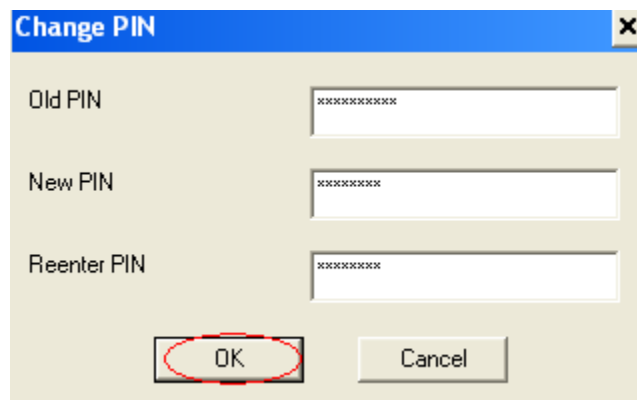

5. The PIN is now set to the default value, which is **Password#1**

6. To change the PIN click **Token > Change PIN**

- 7. Provide Old PIN: **Password#1** (default PIN)
- New PIN: **any alphanumeric PIN of your choice**
- Reenter PIN: **same as New PIN**
- Click **OK**

8. Your PIN is successfully changed. You are required to punch in this PIN whenever prompted.
